Summary

Security Engineer (B.Tech CSE, Cyber Security, CGPA 9.44) with 3+ years in IAM and network security: passwordless/MFA authentication, firewall and segmentation hardening, SOAR automation and AWS security investigation. AWS Certified Security – Specialty and Solutions Architect; Research Intern at IIT Madras (ASTHRA Lab) working on AI for security.

Education

Vellore Institute of Technology, VIT-AP University **CGPA: 9.44/10.0**
B.Tech in Computer Science & Engineering, Specialization in Cyber Security *Amaravati, Andhra Pradesh*

Experience

Digital Fortress Private Limited **May 2023 – Present**
Security Engineer | Network Security, Firewalls, IDS/IPS, VPN, AWS, IAM, Wazuh, Linux

- **Network Security Operations:** Strengthened network perimeter security by reviewing 200+ firewall rules and eliminating approximately 30% of redundant or overly permissive entries, improving policy enforcement & reducing unnecessary network exposure.
- **Firewall & Network Segmentation:** Implemented VLAN-based network segmentation, reviewed firewall access policies, and strengthened VPN and remote-access security through MFA enforcement and access-control improvements.
- **Security Monitoring & Incident Response:** Analysed firewall, IDS/IPS, and authentication logs to investigate suspicious activities, triage security alerts, and support security incident response; conducted periodic access reviews and joiner-mover-leaver checks.
- **Cloud Security Risk Investigation (AWS):** Investigated a security compromise involving 70+ EC2 instances and 40+ S3 buckets, uncovering over three months of attacker persistence and 1+ TB of accessed data; extracted Indicators of Compromise (IoCs) and recommended enhanced logging and access controls.
- **Security Automation – ARGUS:** Developed an agentic SOC/SIEM platform ingesting 1,500+ security events, with automated classification across 50+ MITRE ATT&CK techniques at 90%+ accuracy; implemented response agents that reduced incident response time by 70%.

Projects

Aegis IAM – Zero-Trust Identity Platform | *Keycloak, OIDC, SAML, OPA, Terraform* **Aug 2026 – Oct 2026**

- Deployed Keycloak SSO for 4 apps (3 OIDC, 1 SAML) with TOTP/WebAuthn MFA and 10 role- and group-based profiles.
- Authored 15 OPA/Rego attribute-based policies with step-up MFA for admin actions; validated on 40+ allow/deny tests.
- Codified realms and clients in Terraform, cutting onboarding from about 45 to under 5 minutes; 2,000+ events sent to Wazuh.

PrivScope – AWS Least-Privilege Auditor | *Python, boto3, CloudTrail, NetworkX, Terraform* **May 2026 – Jul 2026**

- Built a boto3 scanner with 20+ IAM checks (wildcards, unused keys, missing MFA, trust policies); 35+ sandbox findings.
- Modeled IAM as a NetworkX graph to find 8 privilege-escalation paths (PassRole, CreatePolicyVersion); risk-scored reports.
- Generated least-privilege policies from 5,000+ CloudTrail events, cutting granted permissions by about 65% per role.

Blockchain Forensics Tool (AP CID Collaboration) | *Python, Neo4j, NetworkX* **Dec 2025 – Mar 2026**

- Designed and developed a blockchain investigation platform capable of processing 500+ transactions and identifying suspicious fund-transfer patterns.
- Implemented wallet attribution and graph-based analytics to analyze 200+ wallets and uncover relationships between cryptocurrency addresses.

Technical Skills

Network Security: TCP/IP, Routing & Switching Fundamentals, Firewall Policy Management, Firewall Rule-Base Review, IDS/IPS, VLANs, Network Segmentation, VPN, Network Traffic Analysis, Wireshark, Perimeter Security, Remote Access Security
Cloud Network Security: AWS VPC, Subnets, Security Groups, Network ACLs, VPC Flow Logs, EC2 Security, AWS IAM, CloudTrail, Cloud Security Monitoring
Security Operations & Risk: SIEM, SOAR, Incident Investigation, Threat Detection, Risk Identification, Security Configuration Assessment, Vulnerability Management, Security Documentation, Wazuh, Splunk, Elasticsearch
Identity & Access Management: OIDC, OAuth 2.0, SAML, SSO, MFA, FIDO2/WebAuthn, RBAC, ABAC, Keycloak, OPA/Rego, Least Privilege, Access Reviews
Automation & Infrastructure: Python, Bash, SQL, Terraform, Docker, Linux, boto3, NetworkX, Security Automation, Technical Reporting

Certifications

AWS Certified Security – Specialty	Aug 2026	**AWS Certified Solutions Architect**	May 2025
Google Cybersecurity Professional	Jun 2026	**Network Security Practitioner (CNSP)**	Nov 2025

Leadership and Extracurricular

Null Chapter, VIT-AP – Technical Lead **Oct 2024 – May 2026**
Led 15+ cybersecurity workshops, designed CTF challenges and mentored members in practical security.
