Sai Abhiram Kolluru

i-mAshura

Education

Vellore Institute of Technology, VIT-AP University

B.Tech Computer Science (Cyber Security); CGPA: 9.39/10.0

SR Junior College

Intermediate (MPC) Percentage: 97.3%

Sri Chaitanya High School

SSC; Percentage: 99.1%

Relevant Coursework

September 2023 – May 2027

Andhra Pradesh, India

June 2021 – May 2023

Gollapudi, India

June 2020 – May 2021

Ibrahimpatnam, India

- Data Structures
- Software Methodology

- Cryptography
- Database Management

- Network Security
- Network-IDPS

- Systems Programming
- Cloud Computing(AWS)

Experience

Center of Excellence (AIR), VIT-AP UNIVERSITY

Researcher – Automotive Security Research (ICSim)

June 2025 – October 2025

Amaravati, Andhra Pradesh

- Analyzed 5,000+ CAN bus frames in the ICSim environment to identify protocol vulnerabilities within vehicle networks.
- Executed 10+ adversary simulations to manipulate critical vehicle behaviors (speed, signals), programming attack scripts and documenting 15+ findings to ensure 100% reproducibility..

Projects

NexusSOAR – Automated SOAR Platform

Dec 2025 – Jan 2026

- Built NexusSOAR, a custom SOAR platform integrating Wazuh SIEM, n8n workflow engine, and Catalyst (Security Brewer) to automate SOC response tasks.
- Engineered alert enrichment, IOC extraction, and response playbooks for common incident types (SSH brute force, anomalous logins, network scanning), reducing manual triage effort by 70%.
- Processed and enriched 10,000+ SIEM test alerts and 1,000+ real-time alerts through script-driven pipelines, enabling structured reporting and faster incident classification.

PII Masker with DSLM – PII Data Analysis and Masker

Jul 2025 – Aug 2025

- Developed a DSLM-based PII masking system trained on 5,000+ custom records integrated with NVD contextual data for intelligent sensitive data detection.
- Automated masking for 10+ entities including IDs, emails, phone numbers, and IP data with ~90% accuracy.
- Built an end-to-end pipeline for preprocessing, model training, and privacy-focused document sanitization, reducing manual redaction effort by 70%+.

LogDefender – Mini SIEM & Log Analysis Tool

Sept 2025 – Nov 2025

- Analyzed 1,500+ Apache and Linux auth logs for anomalies and produced 120+ HTML/JSON forensic reports.
- Detected 65+ brute-force attempts and 25+ suspicious IPs, triggering instant alerts.
- Enabled real-time log analysis of 500+ entries/sec, improving detection by 70%.

Technical Skills

Security & Monitoring: SIEM, Splunk, Wazuh, Log Analysis, Alert Triage, IDS/IPS, Suricata, Snort, SOAR

AI & Automation: n8n, DSLM, LLM Integration, Hugging Face Transformers

Security Tools: Nmap, Nessus, Metasploit, Wireshark, Burp Suite

Programming: Python, Java, Bash, C/C++, HTML5, CSS, JS, SQL, Object-Oriented Programming

OS & Cloud: Linux, TCP/IP, Packet Analysis, AWS (IAM, S3), Git/GitHub

Soft Skills: Event Management, Team Mentorship, Community Engagement, Public Speaking

Certifications

Certified Network Security Practitioner (CNSP) | The SecOps Group | Certificate

Nov 2025

Certification in Cyber Security and Ethical Hacking | Blackbucks | Certificate

May 2025

Leadership and Extracurricular

Null Chapter (Null Open-Source Community), VIT-AP | Technical Lead

Oct 2024 – May 2026

- Led 10+ pentesting sessions and designed CTF challenges while mentoring members in practical security.

Microsoft Student Community (MSC), VIT-AP | Executive Secretary

Mar 2024 – Feb 2026

- Managed 10+ hackathons and webinars, overseeing end-to-end coordination and community engagement.
